

## DCOM Settings on Windows XP for WAST (Microsoft Web Stress Application Tool)

1. Open the Start->Run panel and execute dcomcnfg.exe

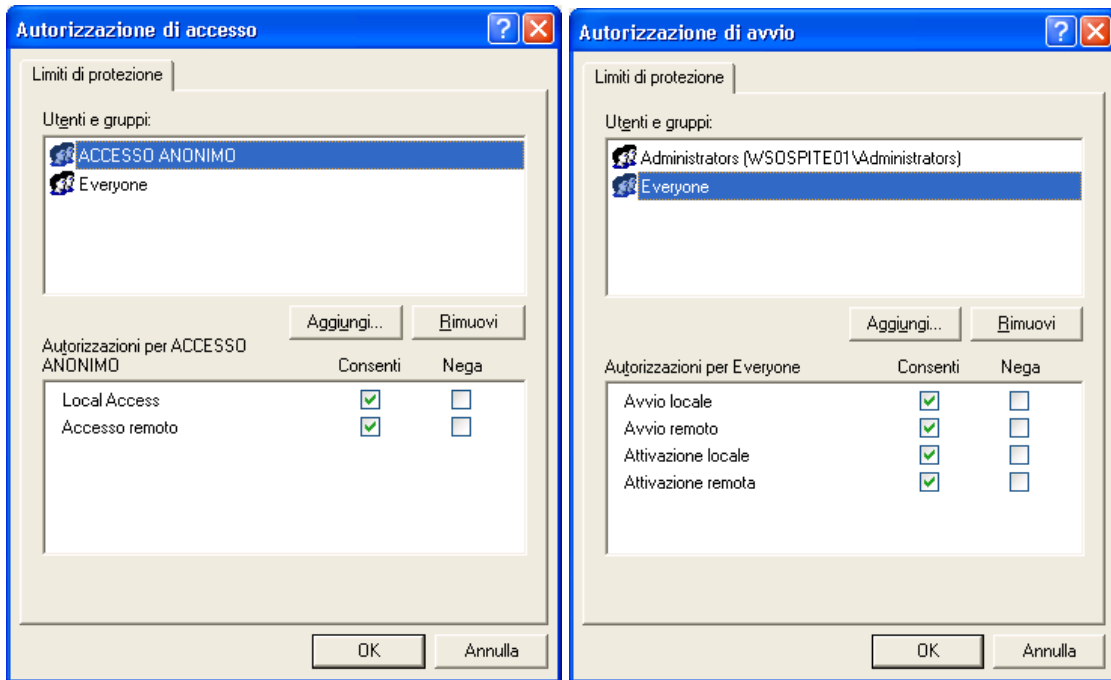

2. Open the properties for "My Computer"

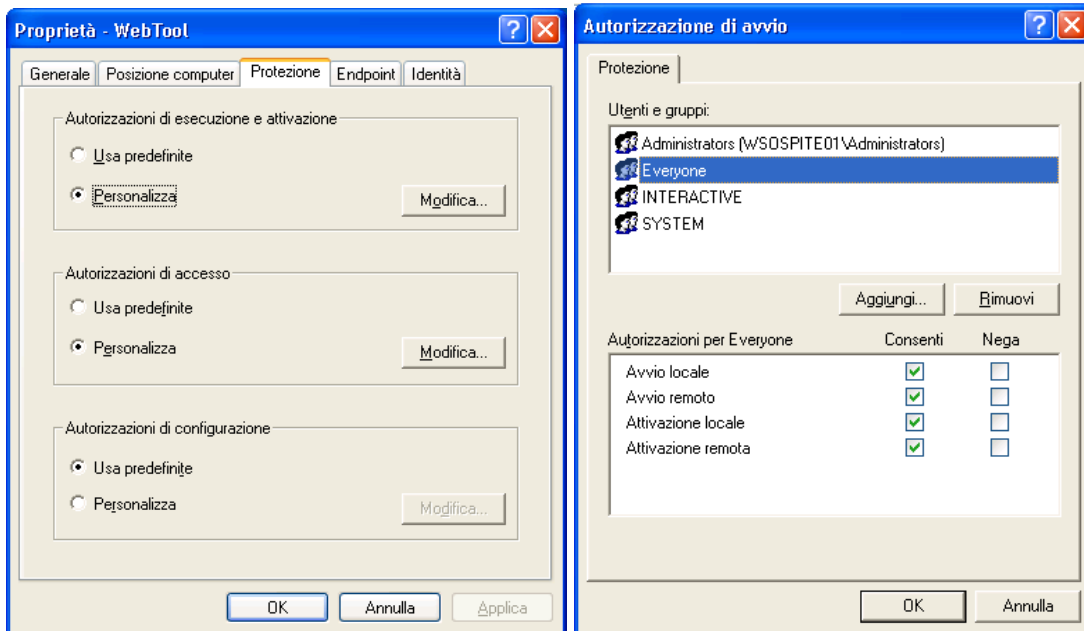

3. On the "Default Properties" Tab select the checkbox "Enable COM Internet Services on this computer"

4. On the "COM security" click the button Edit Limits for Access Permission and grant to ANONYMOUS LOGON the Remote Access right. Then click the button Edit Limits for Launch and Activation Permission and grant to EVERYONE Remote launch and Remote Activation rights.

5. Open "DCOM Config" tree and select the "Webtool" component.  
Open the Properties.  
On the Security Tab customize the launch and Activation Permissions and grant All rights to Everyone.

6. Restart MS DTC and the WebTool service

C:\> net stop webtool ; net start webtool

6. Verify

Add and connect more clients: the status now is connected
